Younger Americans' Reading & Library Habits

[The Pew Research Center for Internet & American Life](http://libraries.pewinternet.org/2012/10/23/younger-americans-reading-and-library-habits/) has a new study that delivers good news about the rise of reading among readers aged 16-29 years. The report finds that eight in 10 Americans under the age of 30 have read a book in the last year, and many of them look to the library as a source for both print and electronic materials. Sixty percent of young people surveyed visited the library last year.
